SUMMARY

Fresh graduate in Informatics Engineering (GPA 3.74) with a deep focus on Data Analytics. Experienced in executing end-to-end data analysis projects, including ETL pipelines, data cleaning, Exploratory Data Analysis (EDA), data modeling (star schema), and interactive dashboard visualization using Excel, SQL, Python, and Power BI. Possesses strong understanding in Decision Support System (DSS) development and AI/NLP implementation. Proven ability to transform raw data into strategic business insights and ready to contribute fully as a data-driven Junior Data Analyst.

TECHNICAL SKILLS

- Data Analysis & Modeling: Data Cleaning & Transformation, Exploratory Data Analysis (EDA), Data Visualization, Business Intelligence (BI), Statistical Reporting, Star Schema, Predictive Modeling.
- Tools & Software: Power BI (DAX, Power Query), Microsoft Excel (Pivot Table, XLOOKUP, Complex Formulas), SQL (MySQL, SQLite), Python (Pandas, NumPy, TensorFlow, Keras).
- Web Development & Others: PHP, HTML, CSS, JavaScript, Flask, Ngrok, Figma (UI/UX).

PROJECT EXPERIENCE

FMCG Sales Performance Dashboard – KarirNex | Excel, Power BI, SQL, Python | March 2026

- Built an ETL data pipeline to clean 20,000+ transaction records, including deduplication, type casting, and handling missing values using Excel, SQL, and Python.
- Analyzed FMCG sales performance across various channels (Offline, Toko Hijau, Toko Oren) and identified the Food category as the primary revenue driver.
- Extracted top customer profiles via grouping aggregation techniques to provide data-driven customer loyalty strategy recommendations.
- Designed an interactive Power BI dashboard visualizing key metrics (Total Revenue IDR 294 Million, 7,000+ orders) to support rapid business decision-making.

Indonesia Tourism Destination Analysis | Power BI, Power Query | March 2026

- Designed a star schema data model integrating 4 relational tables (destinations, users, reviews, tour packages) for analytical efficiency.
- Optimized data transformation using Power Query and developed value index calculations using DAX to measure destination quality.
- Presented strategic findings regarding customer satisfaction trends and price correlations in top tourist destinations (Yogyakarta and Bandung) through comprehensive data visualization.

Grocery Store Sales Analytic Dashboard – KarirNex | Excel | February 2026

- Processed retail transaction data and applied conditional logic functions (IFS) for Grand Total classification and Discount Tier segmentation (6 levels).
- Solved analytical case studies using advanced functions (SUMIFS, COUNTIFS, Pivot Table) to map monthly sales performance.
- Created an executive dashboard including 4 KPI scorecards and interactive visualizations to monitor products with the highest revenue contribution.

Livestock Population Analysis Central Java (2019–2024) – Special Skill | Excel, Python, Power BI | February 2026

- Integrated 6 historical datasets (2019-2024) on livestock population from the government data portal for growth trend analysis.
- Conducted Exploratory Data Analysis (EDA) across 35+ administrative regions to identify livestock commodity growth patterns.
- Validated Broiler Chickens as the highest-growth commodity (+416 million increase) and identified Demak Regency as the primary production hub.

Decision Support System (DSS) for Excellent Students - Universitas Pamulang | PHP, MySQL | Feb - Oct 2025

- Developed a web-based Decision Support System (DSS) to rank outstanding students objectively.
- Implemented the Multi-Factor Evaluation Process (MFEP) algorithm into the system backend to minimize subjectivity in managerial assessment.
- Improved the efficiency of the student ranking process by automating the calculation of objective and subjective factor weights.

AI Chatbot Customer Service "BengBOT" - MSIB Orbit Future Academy | Python, NLP, Flask | Feb - July 2024

- Designed a Natural Language Processing (NLP) pipeline (tokenization, lemmatization, padding) to increase chatbot customer service accuracy up to 99% using LSTM.
- Built the application backend architecture using Flask and deployed the system in real-time.
- Collaborated in a cross-disciplinary team to design interactive UI/UX using Figma prior to technical development.

WORK EXPERIENCE

E-Commerce Admin | A&A Parts | September 2021 – September 2022

- Managed, optimized, and updated 60+ product listings regularly across various e-commerce platforms to improve product visibility.
- Monitored incoming order data, validated daily sales transactions, and controlled inventory management to ensure 100% operational data accuracy.

EDUCATION

Bachelor of Informatics Engineering | Universitas Pamulang | August 2021 - September 2025

- GPA: 3.74 / 4.00
- Thesis: Implementation of a Decision Support System to Determine Excellent and High-Achieving Students Using the MFEP Method (Case Study: PPTQ Darussunnah Parung Bogor).

Certified Independent Study (MSIB Batch 6) | Orbit Future Academy | Feb 2024 - July 2024

- Program Focus: AI 4 Jobs (Full AI Project Cycle: Data Acquisition, Exploration, Modeling, Evaluation, to Deployment).

CERTIFICATIONS & TRAINING

- Data Analyst Bootcamp (Excel, SQL, Python, Power BI) | KarirNex, 2026
- Intensive Bootcamp MS. Excel Specialist (Batch 6) | KarirNex, 2026
- Data Analyst Bootcamp | Special Skill Indonesia, 2026
- Intermediate SQL | DataCamp, 2026
- Programming Competency Certification | LSP UNPAM, 2025
- AI 4 Jobs - MSIB Kampus Merdeka Cycle 6 | PT. Orbit Ventura Indonesia, 2024

KEGIATAN & AKTIVITAS

Microsoft Excel Trainer | Community Service (PKM) - SMP Falatehan Serpong | November 2023

- Developed curriculum materials and served as the lead instructor for basic Excel training, guiding 15+ students in data processing practices and basic mathematical operations.
